

Discovery

This is the Discovery Project Menu for the Spring term. Some of you have completed tasks on it and some still need to do some. Please try to complete as many as possible, 1-2 a week would be ideal. I've added in extra tasks for those who already completed some as homework. Please don't do them again if you have done them before.

Make a model of a Stone age house/dwelling. Can you use materials that would have been available in the Stone Age?	With the supervision of an adult, try whittling/carving something out of wood or stone. Take some photos so you can show the progress.	Practise writing maths problems in words. Example: The woolly mammoth ate 3 times as many meals on Thursday as he did on Wednesday. He ate 12 meals on Thursday. How many meals did he eat on Wednesday?	Write a 7-day diary, imagining you were a child in the stone age. What happened that week? What did you eat, see, do and smell?
Try sewing or making an item of clothing that someone might have worn in the Stone Age. If you haven't got any fabric, make it out of card/paper instead to show your design.	Research the types of food that was available to Stone age people. Can you write a recipe using food that Stone Age people had access to?	Create a timeline to show just how long ago the Stone age was. Can you put any other time periods on your timeline?	Make a sculpture out of only natural material. Take some photos of it and email them to me.
Research the different types of stone used by Stone Age people. Describe what these stones were useful for and why.	Make up a quiz with facts about The Stone Age. Make sure you also include an answer sheet.	Write a list of at least 5 questions that you would like to ask a Stone Age person.	The wheel was invented during the Stone Age. What is a wheel used for? Design something that uses a wheel/wheels.
