

# Week 8 Y4 Discovery

## Humna

- learn about the different types of teeth

### Teeth

- Our teeth help us to eat our food.
- We bite with our incisors and our molars help us chew the food before we swallow it.

- Molar
- Incisor
- Canine
- Carnivore
- Herbivore
- Omnivore
- Enamel
- Decay

- The first set of teeth we have are called milk teeth.
- Children have 20 milk teeth.
- As we get older we lose them, and our adult teeth grow.
- Adults have 32 teeth.
- Why do you think we lose teeth as we grow up.

Then, set up your experiment!

Look through the slides and do some of your own research to present in your book.

## Humans and Other Animals

### Teeth and Eating pt1

#### Did you know?

- The first president of the USA, George Washington, wore false teeth made of teeth from a cow, hippopotamus and walrus!

## Music Lessons Week 1 Year 3 and 4

Each week we will upload lessons sent by Mrs Bird as part of your Music Sound Start program you would normally get in school. The files and videos are uploaded to Charanga Yumu. You can login in here: <http://www.croydonmusicandarts-soundworks.co.uk/yumu/login>

The lessons are designed so you can do them without having your instrument at home (if you do that is also helpful). You should have a Charanga login sent to you from your class teacher, if you don't have one please let them know and they will send it. Email any work to your class teacher and they will forward it to Mrs Bird.

Log in to continue your music lessons from where we left off in school. You will not need your instrument. Mrs. Bird will update these lessons weekly. I will send you your password in case you have forgotten it!

## 30 Days Wild

### Tune into Wildlife Wednesdays!

Every Wednesday at 10am we've some fantastic, brand-new video content suitable for children, families and educators on our [Wildlife Watch YouTube Channel!](#)

### HOW TO DRAW A MOUTH

Art: SMILING & FULL OF TEETH

[Instructions here!](#)  
You just need a pencil and paper...

**Online safety** try these new activities from Thinkuknow with an adult- the resource is about giving advice to someone when they have been upset by someone else online

<https://www.thinkuknow.co.uk/globalassets/thinkuknow/documents/thinkuknow/parents/pdf/thinkuknow-8-10s-home-activity-sheet-4.pdf>

Random Acts of Wilderness

Sign up for the Wildlife Trusts' 30 Days Wild challenge and do one wild thing a day throughout the whole month of June for your health, wellbeing and for the planet.

<https://action.wildlifetrusts.org/page/57739/petition/1>

**01**

Feel the wild between your toes

Think up a way to do it.

**02**

Look up at the clouds

What do you see?

**03**

Find a creepy crawly

What do you see?

**30 Days Wild-Sign up for great ideas for every day in June**

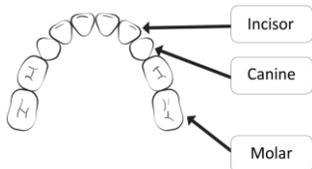

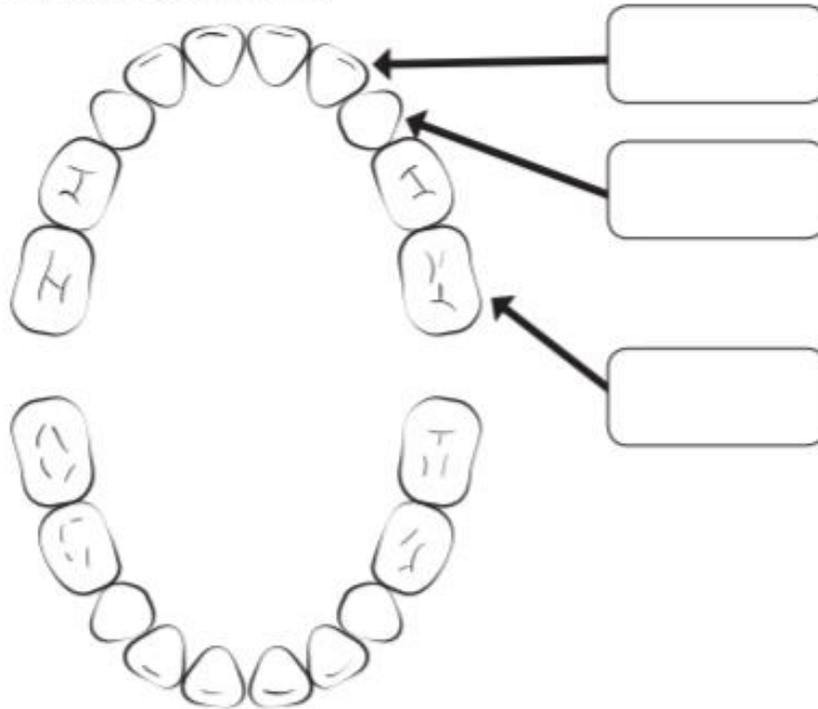

# Tooth map

Name: \_\_\_\_\_

Ask a partner to use a mirror to take a look at your teeth. Imagine the map below is a map of your own mouth.

Put an X through any teeth that are missing.

Colour in any teeth that that have a filling.

In the boxes, label the incisors, canines, molars.

# First impressions

Each pair will need:

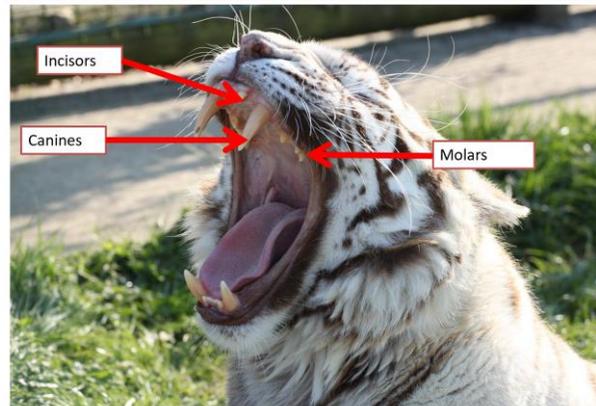

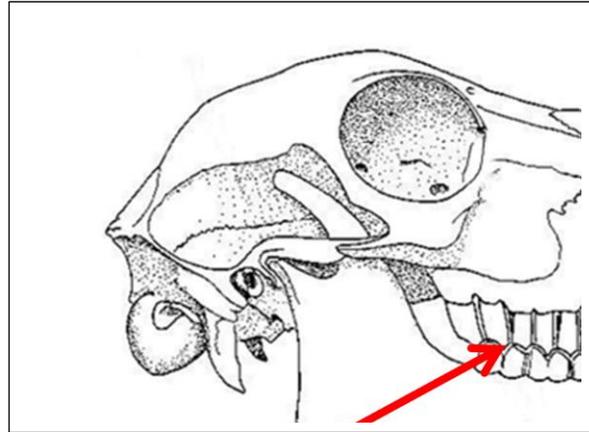

- A polystyrene plate
- A pair of scissors
- A marker pen

1. Divide the polystyrene plate into six equal wedges. (like a pizza)	
2. Cut along the lines to make six wedges.	
3. Take two of the wedges and put one on top of the other together. Cut off 3 cm from the pointed end of the wedges.	
4. Place the two wedges into your mouth as far as possible. 5. Bite down on the wedges as firmly as you can. 6. Label the top and bottom wedges 'Top teeth' and 'Bottom teeth'.	

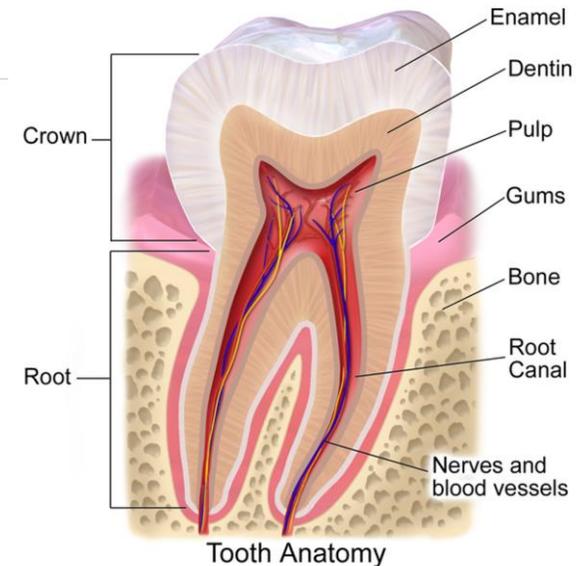

Questions :

- Count the number of teeth marks in the top and bottom impressions.
- Compare your top teeth to the bottom.
- Are there teeth missing, spaces, chips?
- Compare your teeth impression to your partner's.  
Do they look the same?  
How are they the same/different?

## Animal jaws

Carnivores have long pointed canines to grab prey. They have sharp molars for slicing meat.

Which animals were these? Can you tell by their teeth? How?

**Investigate which foods and drinks rot your teeth the quickest.**

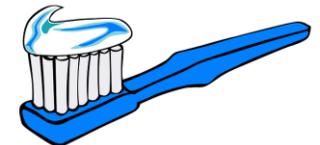

Use pieces of eggshell to represent your teeth. Drop them into some liquids and watch what happens over a few days. You could try lemon juice, coke, orange juice, water, milk etc.

### Tooth Care

- As well as brushing our teeth, some people also use mouthwash and dental floss to keep their teeth healthy.
- These help to remove any bits of food and bacteria from our teeth. Bacteria produce acid which can damage our teeth and cause decay.
- Toothpaste also contains a chemical called fluoride that helps keep our teeth strong.

### Caring for your teeth

- Why do you need to brush your teeth?
- What would happen if you didn't?
- Which types of food are the worst for your teeth?

30  
DAYS  
WILD

All our  
lives are  
**BETTER**  
if they're  
a bit wild

Note down or draw  
your daily Random Acts  
of Wildness and how  
they made you feel.

Share your daily Random  
Acts of Wildness photos  
and wild places using —  
**#30DaysWild**

We hope you've loved  
your wild month.  
Can you stay wild?

# Nature Table

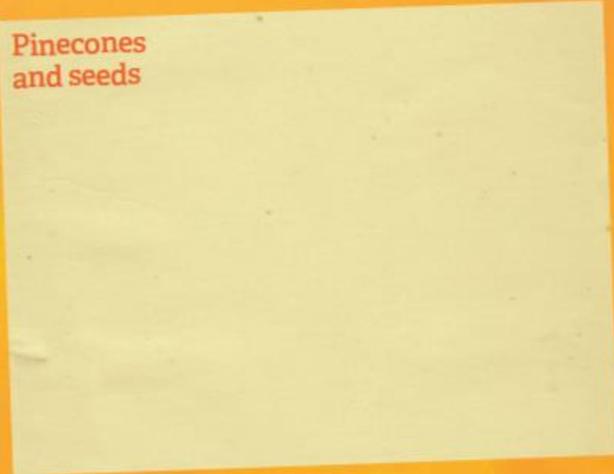

30  
DAYS  
WILD

Use this page to collect things from your adventures in the wild...  
From mud to moss or berries to branches make as much mess as you can!

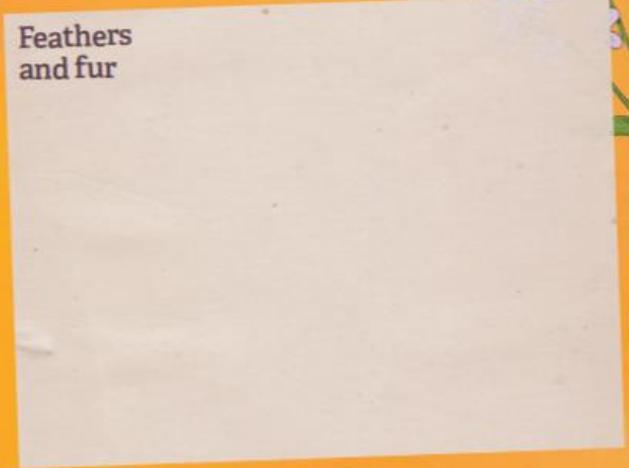

Rocks, stones, fossils  
and bones

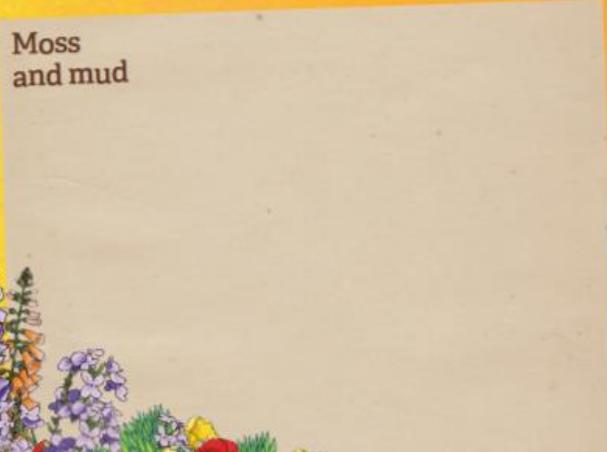

Pinecones  
and seeds

Feathers  
and fur

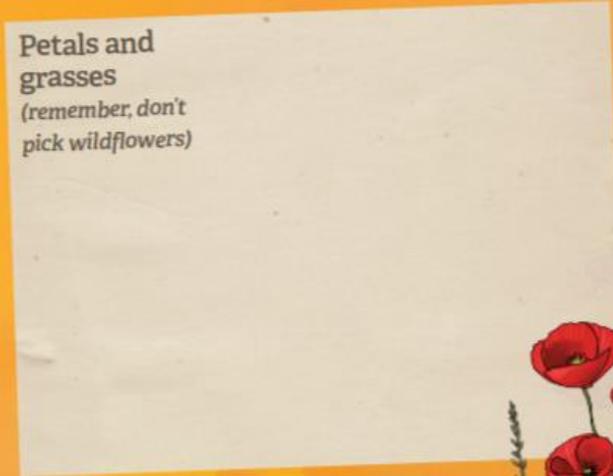

Moss  
and mud

Leaves  
and twigs

Petals and  
grasses  
*(remember, don't  
pick wildflowers)*
