

Discovery

The first thing to remember this week is to ensure you complete your transition activities from your high school – that work is a great way for you to show your new school just what you can do.

Lesson 1

We are going to continue looking at evolution.

First of all I would like you to mind map everything you know about fossils.

Now look at these fossils:

Note down:

What they look like.

If they resemble anything alive today.

Lesson 2

We are going to consider how fossils are formed – there are more than one way.

First watch these videos - <https://www.youtube.com/watch?v=tyOjxjFHW-c>

<https://www.youtube.com/watch?v=xQBkawjFVIA>

Take notes on both of them.

Now you are going to make your own fossils. There are several ways to do this and I have included several links so hopefully you can find one which uses items you have at home.

<https://www.osc.org/diy-fossils/>

<https://www.homegrownfun.com/how-to-make-homemade-fossils-classroom/>

<https://www.bbc.co.uk/cbeebies/makes/presenters-making-a-fossil>

<https://www.littlepassports.com/blog/craft-diy/make-dinosaur-fossils-using-salt-dough/>

Take pictures of your fossils and share them with me.

Wellness Wednesday

First let's do some physical activity:

Mental Health

As lockdown eases I want you to consider what you hope to do in the summer – makes a list of 10 things you want to do with friends, 10 things you want to do with family and 10 things you want to do to prepare for high school. Be sure to check that you will be able to do these things as lockdown rules ease.
