

I am very excited to be teaching Year 4 after Easter. Our topic next term is **Home and Away**. I hope you are looking forward to finding out about different people and places. I am confident this term will be full of learning and I can't wait to see what you teach me!

Miss Carroll

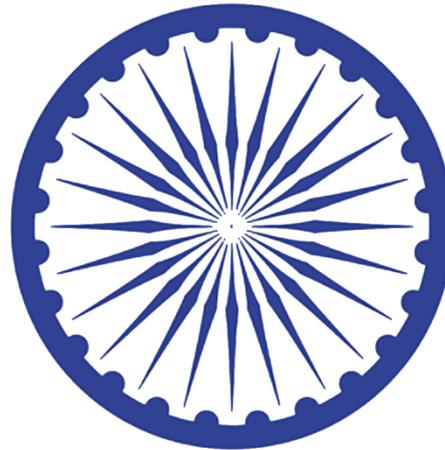

Maths

This term, we will be developing our **understanding of number** and how to calculate using **+** - **x** and **÷** . We will also be solving mathematical problems involving time, shapes, angles and money.

English

After the Easter holidays, we will be looking at the **traditional Indian story** 'Jamil's Clever Cat'. Instead of having a soppy fairy tale ending, we will rewrite it to include much more drama. After making some **information books** about India, we will get **persuasive** by encouraging people to look after our local environment.

HOME & AWAY

SUMMER TERM

If you have some time to explore our new topic...

What is a podcast? Have you ever listened to one? What would you make one about? Did you know your brain uses electricity to control your body? Watch **Operation Ouch! Is my body electric?** on CBBC iPlayer to see a very cool experiment! Close your eyes and imagine you are in India. What do you see, hear, smell, touch and taste? What questions do you have about India?

Computing

In computing this term we are going to become expert podcasters. We will decide what makes a good podcast by listening to a few. In teams, we will **create our own podcasts**.

Discovery

We will be answering our questions about **life in different areas of India**. We will find out how people are finding **innovative solutions** to meet the needs of people living in India. We will create some artwork inspired by **Indian textures and patterns**. We might even FaceTime some school children living in India!

In science, we will be developing our investigative skills by learning all about **electricity** and electrical circuits.
